

# “Anderson Eight”

## Effectors:

1. Cell Function
2. Toxin
3. Biofilm
4. Immunology
5. Endocrine
6. Psychosocial
7. Digestive – GI
8. Physical - Structural

## Note:

**Chronic Disease of any kind (in the absence of genetic or acquired immune deficiency) is never a single issue. In some proportion the effectors listed feed into the terrain that allows the chronic illness to exist.**
